Hi, my name is Parker Boling and I am currently 23. I attended Tecumseh High School and graduated class of 2018. I was 17 when I graduated. Fall of 2018, I started my first semester of college and by the third semester funds ran low, so I had to get a full-time job. I left college with the intent to return. Fortunately for myself, I found a new career path elsewhere. My major was informatics so I definitely know my way around a computer. That would be an understatement. I built the pc I am currently using and I am also a part-time web developer. I have learned HTML, CSS, JavaScript, React, Electron.js, Tailwind.css, and Firebase. I felt comfortable enough with web designing to start my company, Parker's Web Productions in 2021. I am very certain I am capable of completing any task that may be required of me by this job. Since starting my firm I have received two clients that I have built software for. One was a childcare facility I used to attend. I built them a new website using the basics of HTML, CSS, Javascript, and just a hint of PHP. The other piece of software I built was a POS system for an Ice cream shop in Dale Indiana. It was a fully functioning menu with plenty of DOM manipulation. I also worked in a refrigerated warehouse and moved up positions to become a forklift driver and shortly there after found a love for computer science. I'm willing to do whatever it takes to make sure the job gets done properly and with the attention and attitude it deserves.

My most recent employment was at HydromaxUSA. The company specializes in sewer inspections. the field operators use cameras and send them down sewer lines. Once the cameras would come back damaged, we would repair the cameras and replace the motors. We would also replace motherboards and send the cameras back out onto the field for inspections. Unfortunately, due to my father's health concerns, my attendance fell short of acceptable. My father's physical therapy made it impossible for me to work there anymore. I am looking to start a new and rejuvenating career for the next available place that would be willing to accept me. Hopefully, given my computing knowledge, I may be able to give a strong backbone to the company and help in unforeseen ways to accomplish the goals necessary to complete the job efficiently and on time!

Anytime I'm not working on your business or my own, I enjoy spending quality time with family and friends. Acknowledgement of this is the least I can do. I couldn't be where I am today without the support of my family. Any opportunity that is provided by your business, is one I will work hard for. Opportunities can be few and far between.

Thanks for your time, Parker Boling

Authorized to work in the US for any employer

## Work Experience

---

### **Flooring Installer**

Greer's Flooring America - Evansville, IN

September 2020 to March 2021

I installed a variety of different floors, to customer standards, without any complaints. I even got a tip for the good jobs I would do. I Learned some specialty floors as well, but I never got around to doing tile.

## **Grocery Puller**

Winklers Wholefoods Inc. - Dale, IN  
June 2019 to March 2020

Everyday I would use a pallet jack, put a pallet on it, and stack boxes full of food on top the pallet. I would drop it off at the dock for trucks to deliver to the grocery stores. I received max out pay in 4 months from working hard. I was making \$21 an hour at max out pay! I got promoted 3 times in the course of 10 months and provided food for many families during coronavirus time.

## **Restaurant Team Member**

Wendy's (Saren Restaurants, Inc.) - Dale, IN  
May 2018 to August 2018

I was a very hard worker that was commended on my talent by Spencer County News. Everyday I would either work the register, the drive through window, the dishwasher, or the burger station.

## Education

---

### **High school or equivalent**

## Skills

---
